Satellite Symposium

Nutrition and Growth

Thursday 11th May 2017
18:00 – 19:00 | South Hall

50th Annual Meeting of the European Society for Paediatric Gastroenterology, Hepatology and Nutrition (ESPGHAN)
Prague | Czech Republic
Healthy Growth – What we can Learn From Exclusively Breastfed Cohorts

Better insights into the compositional changes of breast milk (protein fractions, lipids, and oligosaccharides) during the period of lactation will help to understand how continuation of breast-feeding beyond the first few months might contribute to growth, development and long-term health.

Ferdinand Haschke | Austria
Department of Paediatrics, PMU Salzburg
Speaking at 18.00

Partially Hydrolyzed Protein: for Whom?

For infants who are not exclusively breastfed, pHFs are as safe as intact CMP formula since nutritional parameters are comparable. Current evidence supports the benefit of a specific pHF containing 100% whey for potentially reducing the risk of atopic dermatitis in at-risk children, during and beyond the intervention period.

Yvan Vandenplas | Belgium
Universitair Ziekenhuis Brussel, Vrije Universiteit Brussel
Speaking at 18.30

Chair: Sibylle Koletzko | Germany
